contributed articles on economic aspects of agriculture in india

the most thorough and comprehensive treatment of american indian agriculture in print multidisciplinary and impressive both in scope and in depth richard white author of it s your misfortune and none of my own hurt s chapters on indian agriculture and water rights in the twentieth century are timely and instructive new mexico historical review

this book examines the various issues and concerns faced by indian agriculture under the obligations of wto and the free trade agreements while the issues discussed pertain mainly to india the lessons can also be derived for many other similarly placed developing countries the book delves into various aspects of indian agricultural trade and evaluates the domestic policies and regulations of government while also looking at external factors like wto free trade agreements and non tariff barriers chapters of this book have been contributed by eminent agricultural economists lawyers and social scientists providing the perspective from their sector this book highlights the challenges and opportunities for agriculture sector under the rapidly growing regional trade agreements and results of negotiations under the wto it also provides critical insights into the ongoing fisheries subsidies negotiations at the wto and issues relating to non tariff measures the findings have broad implications for developing countries in general and india in particular this book will greatly benefit trade negotiators policymakers civil society farmer groups researchers students and academics interested in issues related to the wto ftas tariff and non tariff barriers and other allied issues concerning indian agriculture the techniques used in analytical part will mostly benefit the researchers as they can not only use these techniques and methodologies for their future research but to also carry the research forward the book is useful for many educational institutes which teach international trade agricultural economics and wto and ftas studies

agriculture and allied sectors unquestionably are considered to be the largest source of livelihood in india contributing largely to the gdp of the country however despite a significant increase in the production of food grains the agriculture sector has been facing innumerable challenges primarily because of its dependency on natural resources which have shrunk due to increasing demographic and socioeconomic pressures this book a study assigned by the ministry of agriculture studies different facets of agriculture and allied sectors it provides an overview of indian agriculture and presents an analysis of its performance over the years showcasing the issues faced in the development of agriculture it captures the interventions and initiatives of the government for the development of indian agriculture

authentic and authoritative this presentation shares a comprehensive overview of the extensive research undertaken by the agro economic research centers aercs and the concerns confronting indian agriculture established across the states in india to provide policy feedback to the ministry of agriculture the aercs generated many important research initiatives and debates over five decades this second volume focuses on the problems confronted at the regional level by each of the participating states

indian agriculture clearly needs change the green revolution s momentum has been lost with stagnation even crisis setting in how will this change come about by thinking of agriculture beyond the wheat rice and cotton tobacco framework from irrigation and fertiliser to innovative farming practices credit and infrastructure to farmer distress marketing and pricing to climate change poultry and rabbit farming to horticulture and floriculture this book provides a fresh construct for agricultural growth

this book provides a lucid analysis of agricultural development in india in 17 states and 289 districts over four time periods 1962 65 1970 73 1980 83 and 1990 93
this book is an important study of one of india s priority sectors

presents a chronological account of pueblo indian agriculture examining its refinements challenges and changes up to the present detailing its sophisticated irrigation systems and crop production

this edited book focus on highlighting the evolution of indian agriculture over the past 75 years of independence covering every sector viz crop science horticulture management of biotic abiotic stress post harvest quality management livestock fisheries mechanization marketing and human resource development the book has 30 chapters from most experienced researchers and academicians who are actively engaged in research work on the subject area of the book the book is in line with the strategy for new india 75 brought out by niti ayog it highlights india s success stories in innovation technology enterprise and efficient management together to achieve overall growth while making available food required nutrition and others ecological services it also asses the india s preparedness in terms of commitment toward sustainable development goal sdg the book is a relevant reading material for both students and researchers and policy makers

this open access book provides an evidence based roadmap for revitalising indian agriculture while ensuring that the growth process is efficient inclusive and sustainable and results in sustained growth of farmers incomes the book instead of looking for global best practices and evaluating them to assess the possibility of replicating these domestically looks inward at the best practices and experiences within indian states to answer questions such as how the agricultural growth process can be speeded up and made more inclusive and financially viable are there any best practices that can be studied and replicated to bring about faster growth in agriculture does the prior hypothesis that rapid agricultural growth can alleviate poverty faster reduce malnutrition and augment farmers incomes stand to answer these questions the book follows four broad threads i linkage between agricultural performance poverty and malnutrition ii analysing the historical growth performance of agricultural sector in selected indian states iii will higher agricultural gdp necessarily result in higher incomes for farmers iv analysing the current agricultural policy environment to evaluate its efficiency and efficacy and consolidate all analysis to create a roadmap these are discussed in 12 chapters which provide a building block for the concluding chapter that presents a roadmap for revitalising indian agriculture while ensuring growth in farmers incomes

this edited volume examines the challenges and solutions in the intricate landscape of indian agriculture and global trade it explores the historical shifts from an industry driven to agrarian economy followed by rapid urbanization in the latter half of the 20th century modern agri business is a global phenomenon not only affected by local and regional factors but also by global policies directed by global agencies this book focuses on problems commonly associated with the advancement of agriculture in india as well as issues arising out of global agricultural trade the book contains chapters on associated problems some priority

issues and approaches that could be used to overcome these limitations focused on rural india the book underscores the critical role of agriculture contributing a major part to the national income the book highlights the economic opportunities arising from agriculture emphasizing the need for sustainable practices given ecological cultural and socio economic impacts addressing the complexities the book advocates for diversification adaptive varieties and technological integration including biotechnology and information technologies to ensure the sustainability of agriculture it also stresses the urgency of coherent national policies for soil and water resource use marketing business management climate impacts and more it outlines key interventions and frameworks designed to guide actions on food security and nutrition making a case for india s crucial role in global food production and supply chain systems the book has been written and edited by leading researchers of the respective fields it is a useful resource for students researchers academicians as well as farmers and policymakers

in developing countries like india agriculture sector has enormous human and economic implications what is the roel of backward and forward linkages in agricultural development this book tries to make sense of policy and implementation barriers the establishment of efficient backward and forward linkages plays an important role which determine the productionand distribution potential at a given time and space among the issues the author addresses are input management and distribution production contribution factor contribution market contribution and growth of allied sectors the study analyses the policies formulated and programmes implemented since the first five years plan towards promotion of hyvs fertilisers and farm implements and their economic impact the study is based on state wise secondary data
